Appendix A14.1: Scheme Walkover Summary

1.1 Introduction

The following is a summary of the observations by the Land, Soils, Geology and Hydrogeology Environmental Impact Assessment Team following a physical walkover of the Proposed Scheme. The walkover occurred on 20 February 2020 and 31 January 2022.

Not all observations have been included in this summary for conciseness. Typically, only observations that could not have been determined from a desk study and that are relevant to the Land, Soils, Geology and Hydrogeology Chapter have been included. The omission of an observation or a feature does not negate the feature's importance in terms of the Land, Soils, Geology and Hydrogeology environmental impact assessment.

The observations are summarised in Table 1 and the corresponding photos in Table 2 of this Appendix.

1.2 Summary

The main observations relate to the proposed widening of the road along the Nutley Lane, proposed road widening along the Rock Road where a major level change of up to 5m was observed. The Proposed Scheme runs adjacent to the Booterstown Marsh which is a proposed Natural Heritage Area (pNHA).

Table 1: Scheme Walkover Summary

Observation	General Arrangement (GA) Drawing Sheet Number (refer to Volume 3 of the EIAR for GA drawings)	Description	Possible Impact	Photo Number
Nutley Lane proposed road widening	Sheets 22 to 23	Proposed widening of the road along Nutley Lane along the boundary of Elm Park Golf & Sports Club near St. Vincent's University Hospital.	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_01
Nutley Lane proposed road widening	Sheet 22	Proposed widening of the road along Nutley Lane between the entrance of Elm Park Golf & Sports Club and RTE studios.	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_02
Booterstown Marsh	Sheets 8 to 9	Approximately 40m of new boundary wall is proposed to be set back into the proposed Natural Heritage Areas (pNHA).	This may pose an issue for the earthworks balance and waste assessment and the possibility of mobilising contaminants into the pNHA	Belfield Black_Image_03
Location of a construction compound along Rock Road	Sheet 6	A construction compound is to be located in Booterstown Car Park, within Blackrock Park, along the R118, opposite Willow Terrace.	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_04
Rock Road	Sheets 4 to 5	Proposed widening of the scheme along the Rock Road near the Blackrock Clinic where minor level changes were noted	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_05
Rock Road	Sheets 4 to 5	Proposed widening of the scheme along the Rock Road where significant level changes are observed of up to 5m within Blackrock Park	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_06
Land Boundary, Merrion Shopping Centre	Sheet 12	Proposed widening of the scheme outside the Merrion Shopping Centre	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_07

Observation	General Arrangement (GA) Drawing Sheet Number (refer to Volume 3 of the EIAR for GA drawings)	Description	Possible Impact	Photo Number
Land boundary, Clayton Hotel Ballsbridge	Sheet 15	Proposed widening along this section of the scheme near the Clayton Hotel Ballsbridge. Boundary walls may need to be removed and topsoil stripped to accommodate the works.	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_08
Land Boundary Herbert Avenue	Sheet 11	Proposed Road widening between Herbert Avenue and St. Vincent's University Hospital	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_09
Land Boundary Estate Avenue	Sheet 10	Proposed Road widening outside Estate Avenue	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_10
Land Boundary opposite strand road	Sheet 10	Proposed removal of existing boundary for road widening opposite Strand Road	This may pose an issue for the earthworks balance and waste assessment.	Belfield Black_Image_11
